```
SSH PS4 — 192.168.1.192
Fichier Édition Affichage Terminal Onglets Aide
Welcome to the amazing TMUX of Elive, use ^a to control it [14/0]
Shift + Down      Create a new window
Ctrl + Left/Right Move between windows
Ctrl-a d          Detach session (keeps it running, run "tmux attach" to recover)
Ctrl-a PagUp/Down Scroll terminal
Ctrl-a t          Create a small pane in the bottom (try with - and | too)
Ctrl-a + arrows:  Resize panes
Ctrl-a s          Visually select between all sessions (try with "q" too)
Remember: if you want to keep the session running just detach it instead of logout
Press Enter to start...
If you want to remove this message, edit your ~/.tmux.conf to remove it
